

TABLE OF CONTENTS

	<u>Page</u>
FOREWORD.....	ii
ABSTRACT.....	iii
I. INTRODUCTION.....	I-1
II. METHODS.....	II-1
III. RESULTS .....	III-1
IV. DISCUSSION.....	IV-1
V. REFERENCES.....	V-1
 <u>APPENDIX A</u>	
ANALYSIS OF VARIANCE.....	A-1

LIST OF TABLES

<u>Table</u>	<u>Page</u>
III-1	III-2
Mean canal density (per 1000 m <sup>3</sup> ) of naked gobies by size-class and week.....	
III-2	III-3
Mean canal density (per 1000 m <sup>3</sup> ) of bay anchovies by size-class and week.....	
III-3	III-4
Mean density (1000 m <sup>3</sup> ) of naked gobies in each size-class captured through the left and right port, by week.....	
III-4	III-5
Mean density (per 1000 m <sup>3</sup> ) of bay anchovies in each size-class, captured through the left and right port, by week.....	
A-1	A-2
One-way analysis of variance on the smallest size-class (< 4 mm) of naked gobies, with week as the main effect.....	
A-2	A-3
One-way analysis of variance on the 5-6mm size-class of naked gobies, with week as the main effect.....	
A-3	A-4
One-way analysis of variance on the largest size-class (> 7 mm) of naked gobies with week as the main effect.....	
A-4	A-5
One-way analysis of variance on all size-classes of bay anchovy combined, with week as the main effect.....	

LIST OF FIGURES

	<u>Page</u>
<u>Figure</u>	
II-1 Location of Chalk Point power plant.....	II-2
II-1 Location of the test facility in the intake canal.	II-3
II-2 Location of the test facility used in this study.....	II-4
II-3 Schematic of test facility with	
II-4 Schematic of a bulkhead-mounted screen, with	II-5
II-4 Schematic of wedge-wire configuration.....	
III-1 Ratio of right port to left port entrainment of	
III-1 naked gobies by week of the study.....	III-7
